

VectorField::value

```
graph LR; A[VectorField::value] --> B[VectorField::operator()];
```

A diagram showing a call to a static member function. On the left, a gray rectangular box contains the text 'VectorField::value'. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'VectorField::operator()'.

VectorField::operator()
